# Changes

## ECM File Replacement Compare Feature

- The service tool now has an ECM Replacement File Compare feature for troubleshooting purposes. This feature allows the user to compare one ECM replacement file with another from within the ECM Replacement feature screen. The feature will highlight the differences between the selected files as a whole or the user may select the “only show differences” checkbox.

## Configuration Group Headings on ECM Replacement Feature

- In order to help the user find ECM replacement configuration items easier, configuration items in the ECM Replacement, Fleet Configuration, and Product ECM features are now grouped under their group sub-headings, as is done in the main configuration feature.

Additionally, the following topics will appear in the ReadMe:

## End of Support for Windows 8

- The service tool has ended support for Windows 8.

## Microsoft® Windows™ 11 Compatibility

- Service tool testing has been performed and the service tool is compatible with Windows 11.
