

Peterbilt ECAT Enhanced Search

The new search will provide a more complete and accurate return. The old search capability limited the return to data in the **Final Chassis Bill of Material (FCBM)**-more detail on this below) whereas the new search returns matches in the FCBM and the linked Catalog pages. The new search goes much deeper into the content of ECAT. Given the amount of data searched the return will take longer. We think the more complete and accurate return will be worth the 5-10 seconds of "loading data" observed waiting for the return.

Help Menu

For an overview of the new search capability please access the help menu.

The help menu provides an overview and a few tricks to get the most from your search.

Enter Part Number or Description **!New**

A search can be limited to a specific part description or part number. The FCBM typically does not list parts breakdowns for major components or assemblies. **With the new enhanced search, ECAT now searches both the FCBM record and all linked catalog pages containing the parts breakdowns.** For example if searching for the Wheel Speed Sensor for a specific truck, start the search by typing the words "Wheel Speed Sensor". ECAT will locate the matching assemblies and corresponding link to the Catalog Illustration & Parts List to locate the Wheel Speed Sensor. The link to the catalog will be highlighted in **blue** indicating the search found a matching result on the catalog page. See example below.

To Navigate

To search for a specific word or part number in the FCBM and catalog, use the Enter Search Phrase feature. Type in a word, multiple words or a part number that describes the part being researched in the Enter Search Phrase field. The BOM, Part and Remark buttons will determine where ECAT searches for the requested data. The BOM button searches the bill of material numbers and titles. The Part button searches the part numbers and descriptions listed in the FCBM. The Remark button searches the narrative lines within the FCBM. For more information on combining the word search with other features, see the related topics below.

Note: The old search method was a string based search. The new enhanced search is word based. For example, searching on "lamps" using the old search resulted in matches on **"clamp"** and **"lamp"**. The new search results in a match on just **"lamp"**. Also, the new search supports using multiple words without regard to their order. A search for "Rear Axle Forward" will find a match on a record containing **"forward"** or single **rear axle"**. **!New**

Search Examples

Search for "wheel speed sensor"

FCBM and Catalog

Until now word and part number searches scanned the Final Chassis Bill of Material (FCBM) for the item searched. The FCBM includes only the Bill of Materials (BOM) listed, their descriptions and what is shown when a bill is expanded by clicking on the "+". The search was unable to look into the linked Catalog pages and sub-assemblies from hereon called the **Catalog**. The catalog contains the linked pages with parts lists and illustrations. This is why the new search time will be longer, and again, more complete.

String Vs Word based Search

Word and part number searches were "string based" meaning if that combination of letters or numbers was found it would be returned as part of the search. Examples would be if CAB is searched the return would include CAB, CABINET and CABLE. If P92 was searched the return would include all part numbers with P92 in them (P92-4836-09N1000, P92JAE10L8Q0AW0HA0, A16P921589 etc) A search for LAMP would return LAMP and CLAMP. Searches are no longer string based so the return is only the word or part searched. To duplicate the old string based search a wildcard (*) must be used after the term. If the desired return is all P92 part numbers then the search must be for P92*. If all words including CAB is desired search CAB*. The return will likely include Cabinet and Cable. The word or part number searched will always show highlighted in **yellow**. Links to pages with that word will show in **blue**.

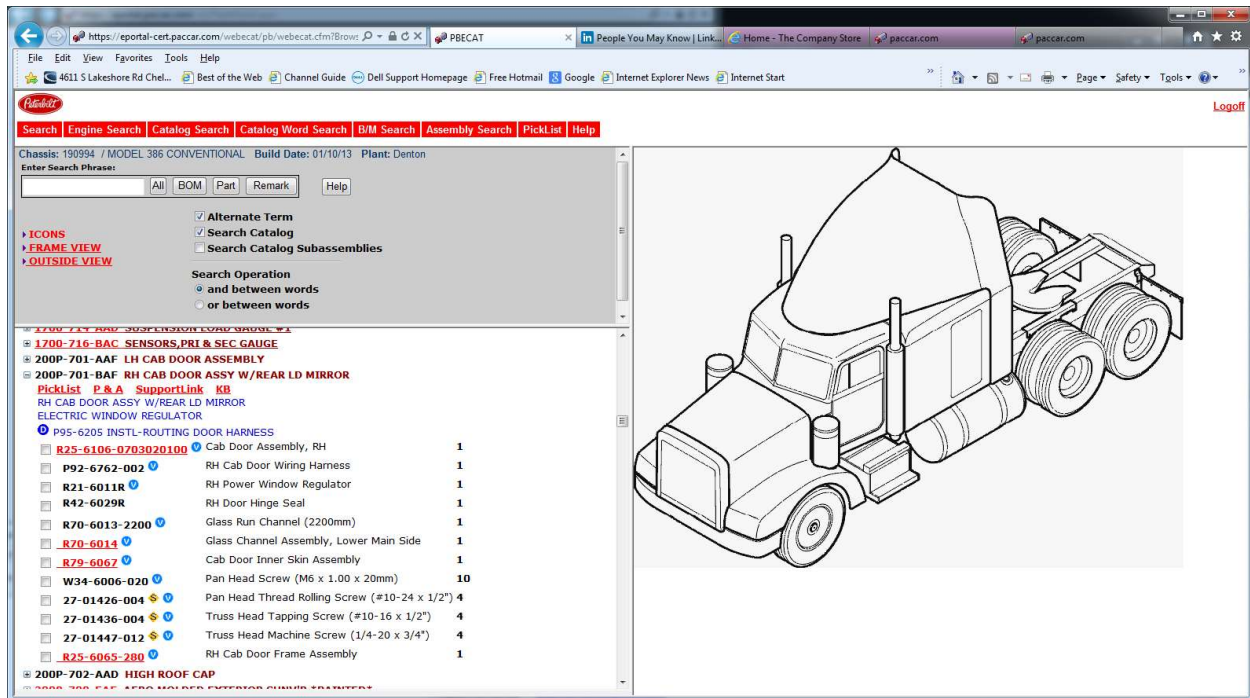

The expanded (opened by clicking the +) FCBM is below. The "old" search would go no farther than searching this data in each Bill of Material (BOM) and BOM title.

The screenshot shows the Paccar ePortal interface. The top navigation bar includes links for Search, Engine Search, Catalog Search, Catalog Word Search, B/M Search, Assembly Search, PickList, and Help. The main content area displays search results for a chassis (190994 / MODEL 386 CONVENTIONAL). The results are organized into a table with columns for part numbers, descriptions, and quantities. The parts listed include sensors, door assemblies, wiring harnesses, and various screws. A 3D wireframe model of a truck chassis is shown on the right side of the page.

Part Number	Description	Quantity
1700-716-BAC	SENSORS,PRI & SEC GAUGE	1
200P-701-AAF	LH CAB DOOR ASSEMBLY	1
200P-701-BAF	RH CAB DOOR ASSY W/REAR LD MIRROR	1
P95-6205	INSTL-ROUTING DOOR HARNESS	1
R25-6106-0703020100	Cab Door Assembly, RH	1
P92-6762-002	RH Cab Door Wiring Harness	1
R21-6011R	RH Power Window Regulator	1
R42-6029R	RH Door Hinge Seal	1
R70-6013-2200	Glass Run Channel (2200mm)	1
R70-6014	Glass Channel Assembly, Lower Main Side	1
R79-6067	Cab Door Inner Skin Assembly	1
W34-6006-020	Pan Head Screw (M6 x 1.00 x 20mm)	10
27-01426-004	Pan Head Thread Rolling Screw (#10-24 x 1/2")	4
27-01436-004	Truss Head Tapping Screw (#10-16 x 1/2")	4
27-01447-012	Truss Head Machine Screw (1/4-20 x 3/4")	4
R25-6065-280	RH Cab Door Frame Assembly	1

The red hyperlink for assembly  [R25-6106-0703020100](#)  Cab Door Assembly, RH connects the user to a catalog page. Until now a search would not include the data in the catalog page.

Catalog Page:

How to Search

The new search default has the “Alternative Term” and “Search Catalog” boxes checked. The search operation has the “and between words” selected.

Search Default:

Search	Engine Search	Catalog Search	Catalog Word Search	B/M Search	Assembly Search	PickList	Help
--------	---------------	----------------	---------------------	------------	-----------------	----------	------

Chassis: 190994 / MODEL 386 CONVENTIONAL Build Date: 01/10/13 Plant: Denton

Enter Search Phrase:

☒ Alternate Term
☒ Search Catalog
☐ Search Catalog Subassemblies

Search Operation
☒ and between words
☐ or between words

[▶ ICONS](#)
[▶ FRAME VIEW](#)
[▶ OUTSIDE VIEW](#)

Check Box Selections - Default

☒ **Alternate Term** When the Alternative Term box is checked the return will include terms loaded in a database that are often used to mean the same thing. Examples could be if lite is searched your return would include light, lght and lt. If tank is searched the return would include tnk. It is recommended this box stay checked.

☒ **Search Catalog** When this box is checked your search includes the FCBM and first level catalog page. If this box is not checked the return will be similar to the old search that includes ONLY the FCBM. It is recommended this box stay checked. The search time will be a little longer than the old search but the results will include more relevant data.

Search Operation

☒ **and between words** If one word is searched your return will include that word wherever found in either the FCBM or the Catalog (assuming default search). If more than one word are searched the return will include where those two words are found (any order) in the same line of either the FCBM or Catalog Page. As an example, if Fuel Tank is searched the return will include Fuel Tank and Tank Fuel if on the same line. The return could also include Fuel Tnk or Tnk Fuel.

Example of a search for BRAKE with default boxes checked.

	Item No	Part No	Qty	Description & Remarks
				NOTE: The Parts List and Drawing for this Bill of Material are for visual reference only and may not reflect the exact parts used on this vehicle at time of assembly. Use the Go Back to Visual ECAT button to return to the FCBM in order to find the exact part number for your chassis and avoid ordering the incorrect part.
\$	<input checked="" type="checkbox"/>	26-03423-022	1	Air BRAKE Hose Assy, SAE Flared, Crimped, (#4 x 22")
\$	<input type="checkbox"/>	26-03427	1	Hose, (EPDM)
\$	<input type="checkbox"/>	26-03431	2	Crimped Hose Fitting
\$	<input type="checkbox"/>	26-03435	2	Flare Swivel (45 Deg)

Those BOM's not in blue have either BRAKE in the Bill of Material Title AND/OR in the content of the Bill itself. BOM 3C00-301-GAF has BRAKE in the BOM title and in the content of the Bill (to expand a Bill click ONLY on the + sign).

In the example below BRAKE is both in the BOM title and contents of the Bill.

Check Box Selections –Optional Search Catalog Subassemblies

When catalog subassemblies are searched the return will be even greater but will also take longer. It is recommended that this box be checked if the default return does not include what is needed.

Catalog subassemblies are hyperlinks to catalog pages from an open catalog page.

A screenshot of the Peterbilt search interface. The search phrase is "brake". The search operation is set to "and between words". The "Search Catalog Subassemblies" checkbox is checked. The interface includes a search bar, a search button, and a list of search results. The search results are displayed in a table with columns for "Part", "Description", and "Quantity". The search results include "BRAKE", "BRAKE", and "BRAKE".

This search will be more complete but take longer. The search will include catalog pages (1st layer) and linked catalog pages inside of pages.

The first page will display when BOM 0051-800-J76 is clicked.

Check Box Selections –Optional or between words

Searching two words using this function will return any BOM or Catalog page where the words are together or separate. The search below included “fuel” and “tank”. The return includes BOM’s and catalog pages where the words appear together or on separate BOMs or page links.

The screenshot shows the Paccar search interface. The search phrase is "Fuel Tank". The search operation is set to "or between words". The search results list includes various BOM items related to fuel tanks and air tanks. Red arrows point to the "or between words" checkbox and the search results list.

Key Takeaways

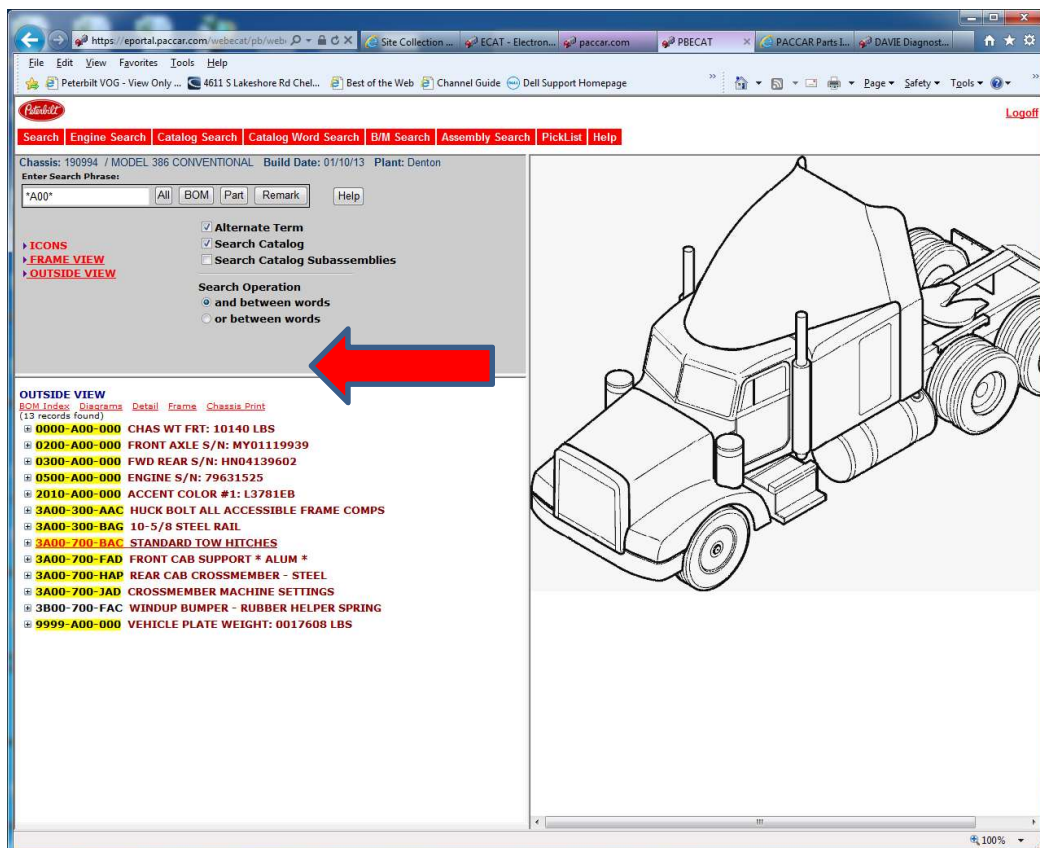

- Linked ECAT pages are now part of the search. Old search included BOM titles and BOM content only.

- The word or part number searched for will show in **yellow** a linked page will be in **blue** with **red** underscore
- Search will take longer but results will be more complete and accurate
- Use a wildcard (*) to search for partial words or part numbers (P92*).
- Start with recommended Defaults checked. If a deeper search into subassemblies is needed click that checkbox.

Using Wildcards

The new search is not string based so cab will not return cabinet and cable. A search for P92 would return all P92-xxxx in the FCBM. To get this result with the new search it is necessary to use a wildcard. P92* will return all P92-xxxx in the FCBM and Catalog Pages.

To search BOM numbers (2600-A00-A05) or groups of BOM's (all A00) it is necessary to use the wild card before and after the number searched. If the desired search is for all BOM's with A00, search *A00*.

Key Takeaways

- Linked ECAT pages are now part of the search. Old search included BOM titles and BOM content only.
- The word or part number searched for will show in **yellow** a linked page will be in **blue** with red underscore
- Search will take longer but results will be more complete and accurate
- Use a wildcard (*) to search for partial words or part numbers (P92*).
- Start with recommended Defaults checked. If a deeper search into subassemblies is needed click that checkbox.
