

# Vehicle Input

The screenshot shows a web browser window titled "Vehicle Input - Internet Explorer". The interface is divided into several sections:

- Top Left:** Navigation menu (Function, Back, Print, Help, Close) and a "Z" label.
- Form Fields:**
  - A:** VIN/Frame No. section with "VIN" and "FrameNo." radio buttons and input fields.
  - B:** "Search" button for the VIN/Frame No. section.
  - C:** "Model Name/Catalog Code" section with input fields and a "Search" button.
  - D:** "Model" section with input fields and a "Search" button.
  - E:** "Production Date" section with a date picker and "E/G" input field.
  - F:** "Color Code" section with an input field and "T/M" input field.
  - G:** "Trim Code" section with an input field and "Rr.Diff." input field.
  - H:** "Remarks" section with a text input field.
  - J:** "Notice" section with a large text area.
- Right Panel:**
  - M:** "Characteristics" table with columns: Charac, Engine1, Engine2, Body, Grade, AT/M/MTM, Trans.
  - L:** "Car Details(Factory Shipment)" section with a large empty area.
  - K:** "Memo" and "Delete" buttons.
- Bottom:** A keyboard shortcut bar with labels N through Y corresponding to F1-F12 keys. A note says "Enter VIN, catalog code or model and press enter key. Add necessary information and press F10 key."

Car Details/Factory Statement: CAR DETAILS (JAPANESE MARKET) IS NOT AVAILABLE IN THIS INFORMATION.

Vehicle information is identified.

- When the 『Vehicle Model Select』 is displayed, select the appropriate model.
- When the 『Catalog Code Select』 is displayed, select the appropriate catalog.
- A catalog marked yellow in the Model Name field is a catalog filtered by the difference in optional parts. However, even if the Model Name field is in yellow, a vehicle which has its Frame No. field in pink cannot be filtered by the difference in optional parts.

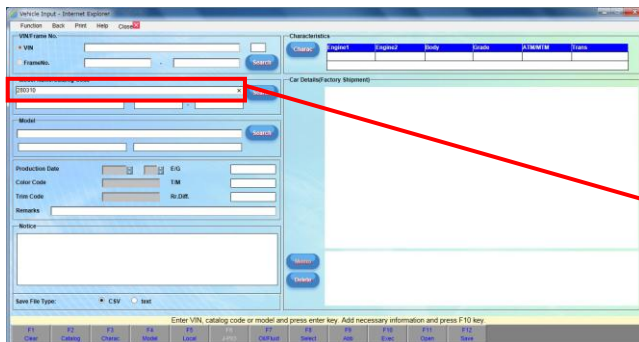

- Notices are posted for products not yet registered in the electronic catalog.

Car Detail/Factory Statement

Vehicle information is displayed.

## Filter the target by a portion of the vehicle model name

①

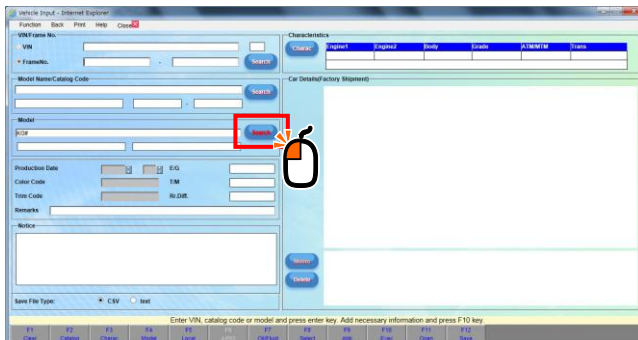

If the full model name is unknown, perform a search using any of the following methods:

- Enter at least the first 2 characters of the model name and add a hash mark (#) at the end. (Ex: KG#)  
→ All vehicle models that start with KG are searched.
- Enter at least the first 3 characters of the model name. (Ex: KGB)  
→ All vehicle models that start with KGB are searched.

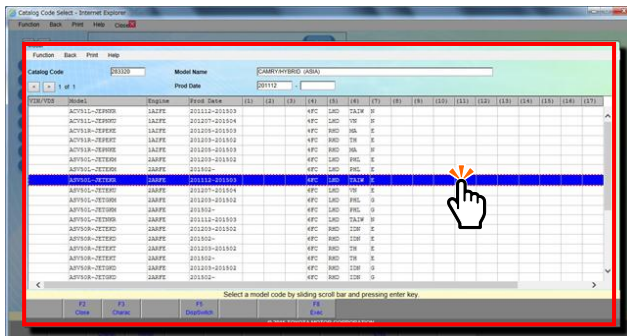

KG#

②

Click on <Search>.

③

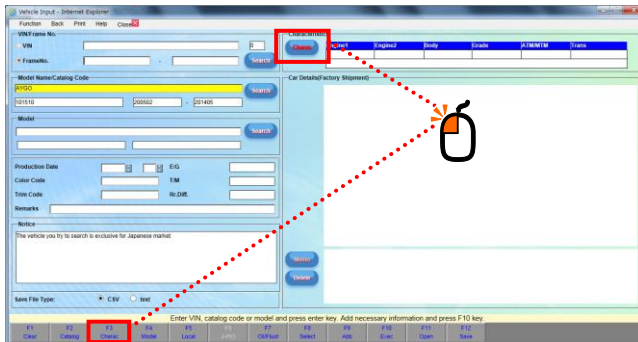

When the 『[Vehicle Model Select](#)』 is displayed, select the appropriate model.

[Return to <Operations>](#)

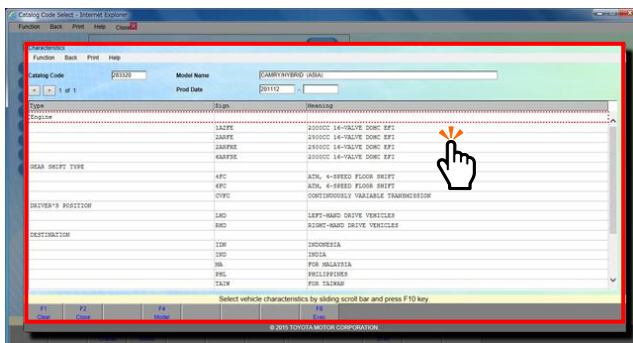

## 5. Specify the model from the characteristics

①

To filter the target vehicle by characteristics after specifying the catalog code, click on either <Charac> or <F3 Charac>.

②

When the 『 [Characteristics](#) 』 is displayed, select the characteristics.

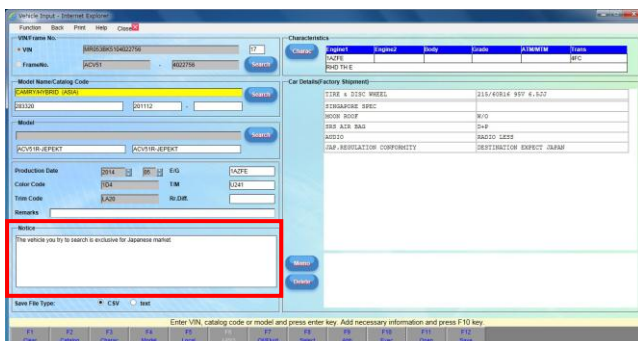

This function cannot be used when the model is specified.

[Return to <Operations>](#)

## 6. Check the notice details

①

A message is displayed when the vehicle information is defined.

- No message is displayed if there is no notice.

[Return to <Operations>](#)

## 7. Check the car details (factory shipment) (e.g. tires, battery size)

1

The screenshot shows a software interface for vehicle information. On the left, there are search fields for VIN, Model Name/Catalog Code, Model, and Production Date. The 'Model Name/Catalog Code' field is highlighted in yellow. The 'VIN' field contains 'JH4GAK550402756'. The 'Model' field contains 'ADVANT'. The 'Production Date' field contains '09/11/12'. The 'Color Code' field contains '1M'. The 'Trim Code' field contains 'EXD'. The 'Remarks' field is empty. On the right, there is a 'Car Details/Factory Shipment' table with the following data:

Item	Value
TIRE & TIRE PRESS	215/40R18 REF 4.500
TRANSMISSION SPEC	
ROOF RACK	NO
ABS AIR BAG	NO
SECCO	SHOCK LESS
SEA REGULATION COMPLIANT	DESTINATION EXPORT ORAM

In a catalog which has been filtered down to one part number, if the vehicle information is defined by the frame number, the car details (factory shipment) are displayed.

!

In a catalog which has been filtered down to one part number (Model Name field in yellow), only vehicle information that has been identified is displayed. A frame number highlighted in pink means a special vehicle in which information is not displayed. "Car details information cannot be identified or no information" is displayed.

[Return to <Operations>](#)

## 8. Create a memo associated with the vehicle

①

The screenshot shows a web-based interface for vehicle information. On the left, there are fields for VIN, Model Name, Catalog Code, Model, Production Date, Color Code, and Time Code. On the right, there is a 'Characteristics' table with columns for 'Characteristic' and 'Value'. A red box highlights a 'Memo' button at the bottom right of the interface, with a hand icon pointing to it.

Click on <Memo> to attach an associated memo when a frame number is defined.

②

The screenshot shows a 'New Memo' dialog box. It contains fields for 'Catalog Code', 'Production Date', 'Fig No.', 'Part Name Code', and 'Part Number'. There are also checkboxes for 'Individual/Personal', 'Open Company', and 'ALL'. A large text area is provided for entering the memo content. A red border highlights the entire dialog box.

The 『[New Memo](#)』 is displayed.

The frame number must be specified in order to attach an associated memo to a vehicle.

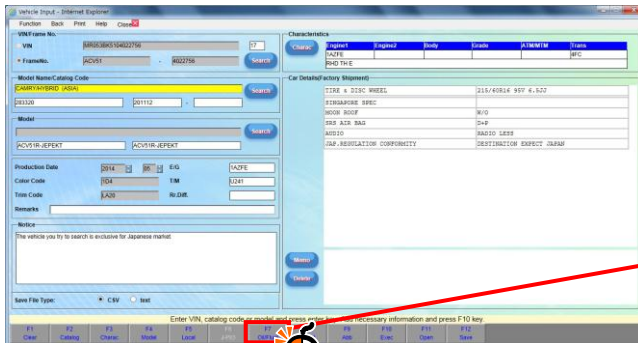

To delete memos, select the rows you want to delete, then click on <Delete>.

The screenshot shows a list of memos. One row is highlighted in blue and contains the text 'Note that pay attention for SSC.'. A red box highlights the 'Delete' button on the left side of the list, and a hand icon points to the selected row.

[Return to <Operations>](#)

## 9. Search for an oil/fluid part number

①

Click on <F7 Oil/Fluid> while the catalog code is defined.

②

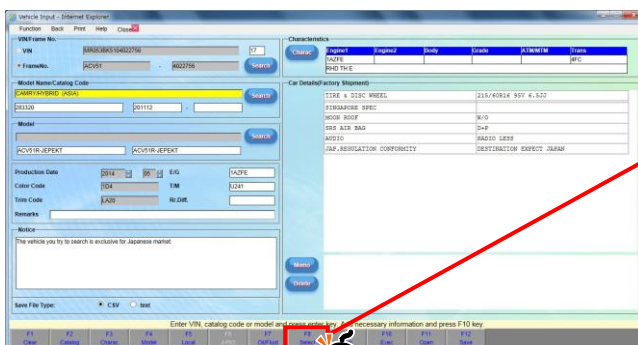

The 『[Recommended Oil & Fluid by Vehicle](#)』 is displayed.

[Return to <Operations>](#)

## 10. Specify vehicle information by calling saved data

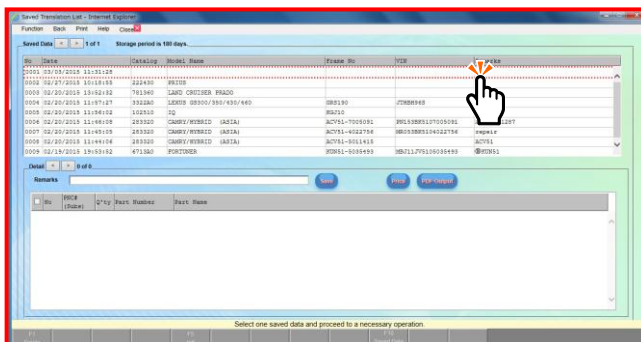

①

Click on <F8 Select>.

②

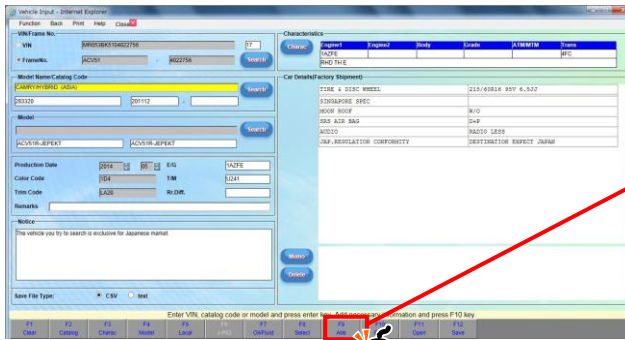

When saved data is shown in the 『[Saved Translation List](#)』, select the vehicle information you want to call.

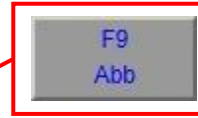

[Return to <Operations>](#)

## 11. Look up meanings of abbreviations

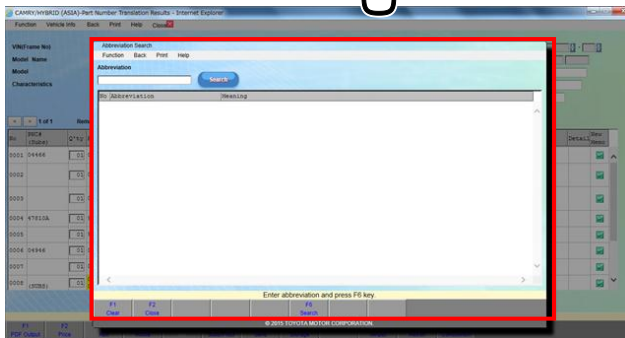

①

Click on <F9 Abb>.

②

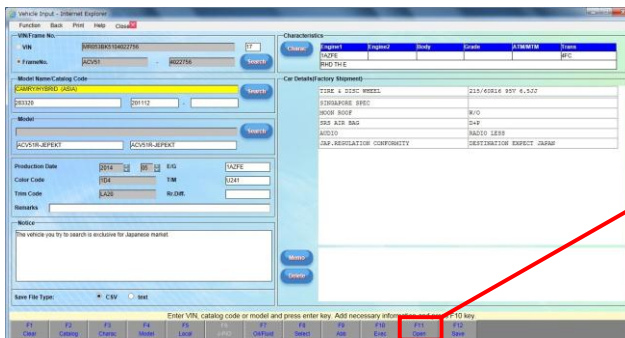

The 『[Abbreviation Search](#)』 is displayed.

[Return to <Operations>](#)

## 12. Use vehicle information (text file) created in other systems for search

①

Click on <F11 Open>.

②

A dialog is displayed. Select data and click on <upload> to import the text file.

[Return to <Operations>](#)

## 13. Search the JPIO catalog

①

Enter the catalog code.

781360

②

Click on <Search>.

③

Click on <F6 J-PIO>.

F6  
J-PIO
